Bachelor of Science in Computer Science (BSc)

Skills

- **Programming:** Python, Java, Assembly, JavaScript, CSS
- **Data analysis:** MS Excel, RStudio
- **Operating Systems:** Unix/Linux, MS Windows, Mac OSX
- **Software:** Visual Studio, Godot, Wing 101, Microsoft Office
- **Languages:** English, Portuguese, Spanish (intermediate)

Work Experience

University of Victoria Victoria, BC
Help Desk Analyst September 2025 - Present

- **Provide** technical support to students, faculty, and staff, assisting with issues related to the campus network, Microsoft 365, Multi-Factor authentication, and various devices.
- **Troubleshoot** and resolve hardware, software and account-related issues while maintaining clear and efficient communication.
- **Strengthening** problem-solving and communication skills in a dynamic, customer-focused IT environment.

Berwick House Victoria, BC
Receptionist June 2025 - August 2025

- **Respond** promptly to resident emergencies by assessing symptoms, contacting emergency services (e.g., 911), and reporting incidents appropriately.
- **Manage** incoming calls to the front desk, redirecting inquiries to relevant departments and ensuring accurate message delivery.
- **Support** day-to-day resident needs, including assistance with technology.

Boathouse at Mayfair Victoria, BC
Shift Supervisor June 2024 - March 2025

- **Assist** in store operations by managing the cash register, processing transactions, and handling exchanges and returns efficiently.
- **Serve** as the acting manager on duty, providing leadership support by overseeing store operations.
- **Deliver** excellent customer service while maintaining accuracy and efficiency, even in high-pressure situations.

Roots at Mayfair Victoria, BC
Sales Associate August 2022 - September 2023

- **Deliver** personalized customer service, ensuring a welcoming and efficient shopping experience.
- **Support** store closing procedures, including end-of-day cash handling, tidying the sales floor, and completing cleaning tasks.
- **Maintain** visual standards by refolding merchandise and organizing displays to enhance product presentation and overall visual appeal.

Technical Projects

Personal Portfolio Website

- **Built** a responsive personal portfolio website to showcase my projects, experience, and skills, with an emphasis on clean layout, smooth navigation, and an easy-to-use design across different screen sizes
- **Structured** the site using modular React components for each section (Home, About, Experience, Projects, Contact), making the codebase easy to maintain, update, and expand over time.
- **Developed** the site using **React, JavaScript, HTML, CSS, GitHub Pages, and Git**, incorporating interactive UI elements and deploying the site for live access and ongoing improvements.

2D Platformer

- **Built** a fully functional 2D platformer in Godot using GDScript, including responsive player movement, jumping, and collision detection.
- **Structured** the project using Godot's scene/node architecture to ensure modularity and scalability.
- **Enhanced** the user experience with intuitive UI elements and polished visual design.

Fishing Game

- **Engineered** a real-time fishing minigame in Godot using C#, incorporating timing-based casting and catch mechanics.
- **Implemented** physics-style movement and sprite animations.
- **Scripted** event-driven logic to handle interactions and reinforce responsive game flow.
