Languages: Python, Java, C, JavaScript, Assembly
Web / Tools: React, Git, GitHub
Data Analysis: MS Excel, RStudio
Operating Systems: Unix/Linux, Windows, macOS
Software: Visual Studio Code, Godot, Wing 101, Microsoft Office
Languages Spoken: English (fluent), Portuguese (fluent), Spanish (intermediate)

Work Experience

University of Victoria

Computer Help Desk Analyst

Victoria, BC
September 2025 – Present

- Provide technical support to students, faculty, and staff for campus network access, Microsoft 365, Multi-Factor Authentication, and device-related issues.
- Troubleshoot and resolve hardware, software, and account-related problems while maintaining clear and professional communication.
- Develop strong problem-solving and customer service skills in a fast-paced IT support environment.

Berwick House

Receptionist

Victoria, BC
June 2025 – August 2025

- Responded promptly to resident emergencies by assessing situations, contacting emergency services, and documenting incidents accurately.
- Managed incoming calls and inquiries, redirecting requests to appropriate departments and ensuring timely follow-up.
- Supported daily resident needs, including assistance with basic technology and administrative tasks.

Boathouse Canada

Shift Supervisor

Victoria, BC
June 2024 – March 2025

- Supported store operations by managing cash transactions, exchanges, and returns with accuracy and efficiency.
- Acted as manager on duty, overseeing staff and ensuring smooth daily operations.
- Delivered consistent customer service in high-pressure retail environments.

Projects

Personal Portfolio Website

- Designed and developed a responsive personal portfolio website to showcase projects, experience, and technical skills to recruiters.
- Built using React, JavaScript, and CSS with an emphasis on clean UI, accessibility, and responsive design.
- Deployed using GitHub Pages with version control managed through Git and GitHub.

Clinic Management System

- Developed a clinic patient management system to create, search, update, and delete patient records with access control.
- Implemented note management with timestamped entries, keyword search, and organized patient histories.
- Built in Python using object-oriented design, JSON-based data storage, and persistent file handling.

2-D Platform Game

- Built a fully functional 2-D platform game in Godot using GDScript, including player movement, jumping, and collision detection.
- Structured the project using Godot's scene and node architecture to ensure modularity and scalability.
- Enhanced the user experience with intuitive UI elements and polished visual design.
